WCTP2026

Workshop on Computation: Theory and Practice
November 25th — 27th, 2026
The Learning Resource Center, De La Salle Lipa, Lipa City, Batangas, Philippines

Computation should be a good blend of theory and practice. Researchers in the field should create algorithms to address real world problems putting equal weight to analysis and implementation. Experimentation and simulation can be viewed as yielding to refined theories or improved applications.

WCTP 2026 is the 15th workshop organized by Institute of Science Tokyo, Chitose Institute of Science and Technology, Kyoto Tachibana University, University of the Philippines-Diliman and De La Salle University-Manila that is devoted to theoretical and practical approaches to computation. It aims to present the latest developments by theoreticians and practitioners in academe and industry working to address computational problems that can directly impact the way we live in society.

WCTP 2026 will feature work-in-progress presentations of prominent researchers selected by members of its Program Committee who come from highly distinguished institutions in Japan and the Philippines. The presentation at the workshop will certainly provide high quality comments and discussion that future research can benefit from.

Invited Speakers

It has not been decided yet. Once decided, we will indicate it here.

Program

It has not been decided yet. Once decided, we will indicate it here.

Important Dates

Submission Deadline:
~~August 15~~ September 15, 2026
Acceptance Notification:
October 15, 2026
Authors' Registration (early registration):
October 16 - 30, 2026
Camera-ready Deadline:
November 5, 2026
Regular Registration:
November 1 - 25, 2026
Conference Date:
November 25-27, 2026

Topics

The WCTP 2026 program will consist of invited talks by prominent researchers and contributed talks from submitted papers selected by the Program Committee. All sessions will be devoted to original research. Major topics of the workshop include, but are not limited to, the following:

Theory of Computation:
Model of computation, Logic, Design and analysis of algorithms, etc.

Software and its engineering
Software organization and properties, Software creation and management, etc.

Security and Privacy
Formal methods and theory of security, Security services, Software and application security, Human and societal aspects of security and privacy, etc.

Human-centered computing
Human computer interaction(HCI), Interaction design, Collaborative and social computing, Ubiquitous and mobile computing, etc

Computing methodologies
Symbolic and algebraic manipulation, Artificial intelligence, Machine learning, Concurrent computing methodologies, etc.

Applied computing
Enterprise computing, Life and medical sciences, Education, Computers in other domains, etc.

Health informatics
Clinical informatics, population health informatics, clinical decision support systems, mobile computing for health, health monitoring systems etc.

Submission

Submissions related to the topics of the workshop are very much welcome. Submissions that relate results from other areas to the workshop topics are also encouraged. Submitted papers should preferably be typeset in LaTeX2e using the style file. We recommend the usual page limits of around 15 pages.

Any submission should include the session name, the title of the paper, names and affiliations of authors, an abstract of 70-150 words, and the contact author's name, phone number, fax number, and email address. The session names are as follows:

- Theoretical Approaches to Computations,
- Practical Approaches to Computation,
- Computation for Community-based Applications,
- Computation Contributing to the Health and Medical Care Field.

Submissions must be in English. The paper must be unpublished and not submitted for publication elsewhere, including journals and proceedings of other symposia or workshops. One author of each accepted paper should be able to present it at the workshop. All submissions should be in PDF file format and uploaded via the EasyChair Conference System.

LaTeX style files and Microsoft Word's template files are available from the following links, which the authors must use.

- LaTeX style files
- Word's template files

Submission Page in EasyChair: https://easychair.org/my/conference?conf=wctp2026

The post-proceedings of WCTP2026 will be published by Atlantis Press.

Peer-Review Policy

WCTP2026 is committed to ensuring the highest level of academic integrity, which includes a thorough and rigorous peer-review process.

1. Submission: All submitted papers will be checked for relevance to the conference themes and scope. The submission should not have been previously published or under review elsewhere.
2. Initial Screening: Each submission will undergo an initial screening for formatting, language quality, and adherence to submission guidelines.
3. Single-Blind Review: Submissions passing the initial screening will then undergo a single-blind peer-review process. In this process, the identities of the authors are visible to the reviewers, while the reviewers remain anonymous to the authors. Submissions are evaluated based on originality, technical soundness, clarity of presentation, relevance to the conference themes, and potential impact on both theoretical and practical aspects of computer science.
4. Reviewer Assignment: Each submission is typically reviewed by at least two expert reviewers within the field. The review panel is selected based on their expertise, and any potential conflicts of interest are considered and managed.
5. Revision and Resubmission: Based on the reviews, papers may be accepted, rejected, or returned to the authors with requests for revision and resubmission. Authors must address the reviewers' comments systematically in their revision and provide a detailed response to the reviewers' comments.
6. Final Decision: The final decision regarding acceptance of a paper is made by the Program Committee, considering the reviewers' feedback and the paper's contribution to the conference's diversity and balance.

Our peer-review process is designed to ensure that all accepted papers meet high standards of quality, originality, and relevance to the conference themes. By submitting a paper to WCTP2026, authors agree to undergo this process.

Registration

The registration page is currently under preparation.

Venue

The Learning Resource Center, De La Salle Lipa.

0:00 / 0:10

Organization

Program Co-Chairs

- Jaime Caro (University of the Philippines - Diliman)
- Merlin Suarez (De La Salle University)
- Masayuki Numao (Kyoto Tachibana University)
- Shin-ya Nishizaki (Institute of Science Tokyo)
- Shigeki Hagihara (Chitose Institute of Science and Technology)

Supporting Institute

WCTP 2026 is supported by De La Salle Lipa and Chitose Institute of Science and Technology.
